Founded in 1919 in Osaka, Japan, Torishima has been providing engineered pump solutions across all industries for 100 years, and has supplied pumps more than 100 countries in the world. The Torishima brand is built on reliability, flexibility, and customer satisfaction. Considered as a world leader in the supply of pumping equipment, Torishima has the capability to supply all pump types and is a specialist in the supply of engineered pumps for larger water transmission and wastewater projects and has supplied pumps for a wide range of low and high-pressure applications for all desalination processes, RO, MED, and MSF, for over 45 years.

Torishima does not only supply the pumps but design, install and commission the complete pumping stations. With a highly skilled engineering team that understands your process requirements, we can provide products suited to your exact requirements.

In addition, as a premier engineered equipment supplier, we are committed to providing the highest quality aftermarket service. Our innovative solutions can enhance performance and increase the lifespan of pumps, other equipment, and plants. This allows operators to maximize efficiency, reduce maintenance costs and conserve energy.

We look forward to having your enquiry.

TORISHIMA Pumps in the World

High-efficiency and Reliable Pumps for a wide range of Applications

Boiler feed pump for thermal power plant [Saudi Arabia]
